Price adjustment 2022

Due to the global situation with increased logistic, raw material and energy costs, Michelin has been forced to increase the price level of all MC-tyres several times since 2021.

the production cost of competition tyres is also affected by this increase and will increase with approx. 5 % for the 2022 season.

As a compensation for this increase, Michelin will support all the riders participating during 2022 by offering 1 set of free tyres to start the season.

The free tyres will be delivered during the first race week-end by our partner LHP Racing.
